

siteconnect *Safety Software*

The image displays three overlapping mobile application screens. The leftmost screen, titled 'Form', shows a 'Risk Matrix' table and a section for listing tasks. The middle screen, titled 'Report Incident', shows a form for entering incident details, including a 'Select Treatment' dropdown and a 'Body Parts' selection modal. The rightmost screen, titled 'Sign In', shows a QR code scanner interface.

Challenges

Common safety challenges SiteConnect helps you solve

Manual Processes

Efficiency, accessibility, and real-time data tracking.

Low Engagement

Decentralized processes and disconnected systems.

Accountability

Gaps in tracking, reporting, and enforcing safety protocols.

Compliance

Navigating regulations, ensuring updates, and monitoring adherence.

Mobile

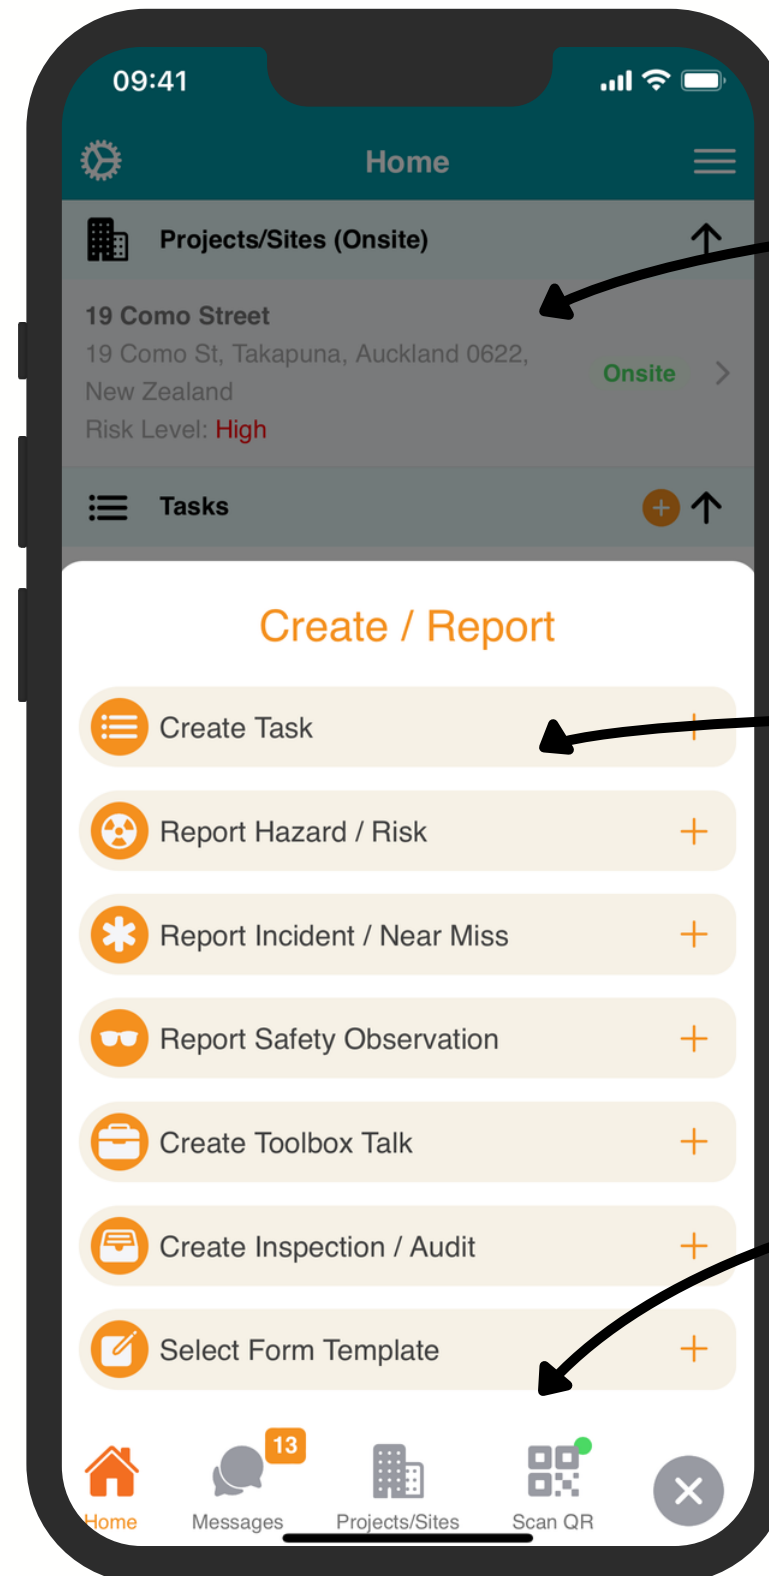

Features

Reporting Functions

- Hazard reporting
- Incident reporting
- Safety observations
- Inspections and audits
- Time spent on site data

User Engagement

- Communications
- User dashboard
- Document depository

● Site-specific

Create site-specific locations breaking your safety management into each site or business division.

● Out of the box forms

Either select from SiteConnect ready to go template forms or build your own.

● Easy to use

Read communications, create tasks, sign into the site and access site-specific documents with the bottom bar.

www.siteconnect.io

SITECONNECT.IO LIMITED

● Web portal

Administrative web portal allowing for flexibility in line with your business goals.

Portal

Features

Admin Functions

- Site reporting
- Contractor management
- Employee management
- Inductions
- incident management

Live registers

- Risk registers
- Contractor insurances
- Employee training

Templates

- SWMS/JSA
- Forms

Dashboards and reporting

Select from a number of dashboards to track trends and leading and lagging indicators.
